Contents

Perspective
33 What is the impact of a research publication?  
S Fazel, A Wolf

Clinical review
G Cox, S Hetrick

Original article
41 Implementing tools to support evidence-based practice: a survey and brief intervention study of the National Elf Service across Oxford Health NHS Foundation Trust  
L Z Atkinson, A Forrest, L Marriner, J Geddes, A Cipriani

Statistics in practice
46 Reporting guidance considerations from a statistical perspective: overview of tools to enhance the rigour of reporting of randomised trials and systematic reviews  
B Hutton, D Wolfe, D Moher, L Shamseer

Evidence-based case conference
53 Prognosis of delirium  
T A Furukawa

Expert commentary
55 Immigrant women and women with learning disabilities have complex mental health needs and service use in the perinatal period  
K Ayre, H Khalifeh

Commentaries
Causes and risk factors
58 Daily use of high-potency cannabis is associated with an increased risk of admission and more intervention after first-episode psychosis  
M Large, O Nielssen

Outcomes
59 Hypersomnia: an overlooked, but not overestimated, sleep disturbance in bipolar disorder  
K A Kaplan, R Williams

Pharmacological interventions
61 Short-term adjunct of topiramate to antipsychotics in schizophrenia improves the psychopathology and has weight maintenance  
T Kishi

Psychological interventions
62 Targeted psychological interventions may prevent depression in children and adolescents  
E Watkins

63 Simpler therapy may successfully treat adolescents with anorexia nervosa  
S Agras

Letter
64 Changing response rates in clinical trials of depression: how did the introduction of DSM-III and DSM-III-R influence the outcome?  
K N Fountoulakis

Further commentaries

Electronic pages
67 Largest study to date shows overall use of antipsychotics in pregnancy does not appear to significantly increase the risk of congenital malformations  
S Grigoriadis, M Peer

68 Uncertain association between depression and stroke risk in a Chinese mega-study  
E J Brunner, I R Weinreb

69 Mood Zoom could be a promising tool for daily mood variability monitoring, potentially differentiating bipolar from borderline patients  
E Isometsä

70 Cognitive–behavioural therapy can prevent transition to psychosis in ultra-high-risk participants in the long term  
J-P Miron, A Abdel-Baki
