

Evidence-Based Mental Health

August 2014 Vol 17 No 3

Contents

Editorial

- 65 Students 4 Best Evidence: a new way of engaging the younger generation in evidence-based health care

Perspective

- 67 Cognitive-behaviour therapy and schizophrenia

Expert review

- 69 Beneficial and harmful consequences of peripartum and postpartum antidepressant exposure

Causes and risk factors

- 72 Need exists for genetic predictors of lithium response
- 73 One-third of children of parents with severe mental illness are at risk of developing severe mental illness
- 74 The comorbidity of epilepsy and psychosis is an important area for continued research
- 75 Among untreated violent offenders with schizophrenia, persecutory delusions are associated with violent recidivism

Original article

- 76 Mental health problems in young people with experiences of homelessness and the relationship with health service use: a follow-up study

Evidence-based case conference

- 81 Prognosis of a brief psychotic episode

Prevalence, assessment and diagnosis

- 83 Autism traits may be more prevalent in ADHD than previously reported

Pharmacological interventions

- 84 Relapse with oral antipsychotics versus long-acting injectable antipsychotics: new paradoxical findings

Statistics in practice

- 85 Addressing missing outcome data in meta-analysis

Psychological interventions

- 90 Schema therapy is an effective treatment for avoidant, dependent and obsessive-compulsive personality disorders
- 92 Comparing a 5-month trial of enhanced cognitive behavioural therapy to a 24-month trial of psychoanalytic psychotherapy for the treatment of bulimia nervosa
- 94 Dismantling mindfulness-based cognitive therapy for recurrent depression implicates lack of differential efficacy for mindfulness training
- 95 Reports of recovery in chronic fatigue syndrome may present less than meets the eye

Miscellaneous

- 96 Primary healthcare workers could help to reduce the burden of common mental disorders in low-income nations

PostScript

- 89 Correction
