

Additional file 2

The following items will be extracted from each included study, using an Excel spreadsheet:

A. Methodology

Author	
Year	
Country	
Aim	
Study design	
Sample size	
Population of interest	
Comorbidities	
Interventions	
Age	
% male	
Setting	
Exclusion criteria	
Other measurements	
Follow-up	
% of attrition	
Response rate	
Missing values	
Method to handle missing values	
Health states	
Respondent	
Method to obtain health states	
Valuation method	

Valuation instrument	
Population used to value	
Adminstration method	
Tariff	
Study arm (if applicable)	
mean1	
standard deviation 1	
observations 1	
mean 2	
standard deviation 2	
observations 2	
Median	
IQR	

B. Risk of bias

Study ID	
Population characteristics	
Respondent selection and recruitment	
Clearly defined Inclusion/exclusion criteria	
Response rate (%)	
Numbers (%) lost to follow-up	
Missing data	
Appropriate use of direct valuation method	
Appropriate use of generic preference-based method
