Perspective
93 How can we optimise learning from trials in child and adolescent mental health?
N Axford, V Berry, J Lloyd, K Wyatt

96 Universal prevention of depression at schools: dead end or challenging crossroad?
P Cuijpers

Original research
99 Effectiveness and cost-effectiveness of universal school-based mindfulness training compared with normal school provision in reducing risk of mental health problems and promoting well-being in adolescence: the MYRIAD cluster randomised controlled trial

110 The impact of mindfulness training in early adolescence on affective executive control, and on later mental health during the COVID-19 pandemic: a randomised controlled trial

117 School-based mindfulness training in early adolescence: what works, for whom and how in the MYRIAD trial?

125 Effectiveness of universal school-based mindfulness training compared with normal school provision on teacher mental health and school climate: results of the MYRIAD cluster randomised controlled trial

135 Do mindfulness-based programmes improve the cognitive skills, behaviour and mental health of children and adolescents? An updated meta-analysis of randomised controlled trials
