Contents

Perspective
93  How can we optimise learning from trials in child and adolescent mental health?
    N Axford, V Berry, J Lloyd, K Wyatt

96  Universal prevention of depression at schools: dead end or challenging road?
    P Cuijpers

Original research
99  Effectiveness and cost-effectiveness of universal school-based mindfulness training compared with normal school provision in reducing risk of mental health problems and promoting well-being in adolescence: the MYRIAD cluster randomised controlled trial

110  The impact of mindfulness training in early adolescence on affective executive control, and on later mental health during the COVID-19 pandemic: a randomised controlled trial

117  School-based mindfulness training in early adolescence: what works, for whom and how in the MYRIAD trial?

125  Effectiveness of universal school-based mindfulness training compared with normal school provision on teacher mental health and school climate: results of the MYRIAD cluster randomised controlled trial

135  Do mindfulness-based programmes improve the cognitive skills, behaviour and mental health of children and adolescents? An updated meta-analysis of randomised controlled trials
    D Dunning, K Tudor, L Radley, N Dalymplye, T Ford, J Montero-Marin, W Kuyken, T Dalgleish
